**ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS**

|   |   |
|---|---|
| <b>Access Line</b>                      | Central office line equipment, or equivalent, and all outside plant facilities, or equivalent, required to connect the serving central office with the customer premises via physical connection, frequency transmission, and/or time slot transmission. From an engineering perspective, a channel connection is at a DS0 level. A DS0 level is a 4 KHz voice channel or a 64 kilobits per second digital channel. |
| <b>Analog Signal</b>                    | A signal that varies in a continuous manner such as voice or music. An analog signal must be contrasted with a digital signal which can assume only discrete values.  |
| <b>Cellular System</b>                  | A high capacity land mobile radio system in which an assigned frequency spectrum is divided into discrete channels that are assigned to a cellular geographic serving area.   |
| <b>Central Office</b>                   | A switching unit in a telephone system providing service to the general public, having the necessary equipment and operating arrangements for terminating and interconnecting lines and trunks.   |
| <b>Centrex</b>                          | A service for customers with many stations that permits station-to-station dialing, one listed directory number for the customer, direct inward dialing to a particular station and station identification on outgoing calls. The switching functions are performed in a central office (stand alone, host or remote).  |
| <b>Channel</b>                          | An electrical communications path between two or more points. A single pair of wires may provide more than one channel. A channel may also be provided by microwave.  |
| <b>Customer</b>                         | A person who uses a telephone as a subscriber.  |
| <b>Digital Signal</b>                   | A signal that has a limited number of discrete states. This may be contrasted with an analog signal that varies in a continuous manner and may have an infinite number of states.   |
| <b>Equal Access</b>                     | The ability of the subscriber to use any long distance service by dialing the same number of digits.  |
| <b>Exchange</b>                         | A defined area served by one or more central offices regardless of technical serving arrangements within which the company furnishes service at rates and rules prescribed for that area in the company's filed tariffs. The area is not necessarily marked by political boundaries or the location of host or remote switching units.  |
| <b>Extended Area Service (EAS)</b>      | The ability of a customer to call customers in other exchanges at no additional charge or at an additional charge per tariff.   |
| <b>Extended Community Calling (ECC)</b> | The ability of a customer to call customers in other exchanges at rates usually above EAS rates but below toll rates for comparable distances. Rates generally include a duration element.  |
| <b>Feature Group A</b>                  | Line-side originating and terminating LATA access for which an originating subscriber dials an assigned telephone number that connects to a specific interexchange carrier (IC). The IC returns a tone to signal the caller to input additional generated digits of the called number.  |

|   |  |
|---|--|
| <b>Feature Group B</b>                    | Trunk-side originating and terminating LATA access for which an originating subscriber dials a 950-WXXX number (where W=0, 1 and XXX is the carrier access code (CAC)), which is translated to a specific XXX carrier trunk group. Optional rotary dial service and ANI may be available.                    |
| <b>Feature Group C</b>                    | Trunk-side LATA access for AT&T-Communications generally on a direct basis between each end office (EO) and an AT&T-C switching system.  |
| <b>Feature Group D</b>                    | Also referred to as equal access. It is trunk-side LATA access affording call supervision of an interexchange carrier, a uniform access code (10XXXXX), optional calling party identification, recording of access-charge billing details and presubscription to a customer specified interexchange carrier. |
| <b>FX-IN</b>                              | A nonswitched service where the customer of the company is connected to and receives switching service through central office equipment located in another exchange area.  |
| <b>FX-OUT</b>                             | A switched service where facilities are provided from the central office out to the exchange boundary where it meets the line from a foreign exchange subscriber.  |
| <b>Host Switching System</b>              | A switching system that provides centralized control over most of the switching functions of one or more remote switching units. The host switching system usually provides trunk access to the operating company intraLATA networks.  |
| <b>Local Access Transport Area (LATA)</b> | A geographic area within which an operating company may offer its telecommunications services.   |
| <b>Mobile Telephone</b>                   | A service which provides radio telephone communication from a mobile vehicle to another vehicle or to a regular telephone.   |
| <b>Paging</b>                             | A service which provides one-way signal or voice communication over a radio channel to a miniature receiver carried by the customer.   |
| <b>Pair</b>                               | Two wires of a single circuit.   |
| <b>Pay Station</b>                        | A telephone which normally requires all users to deposit one or more coins or use a credit card to complete a call.  |
| <b>Private Line Service</b>               | Channel or circuit rented for private use and not intended to be connected to the general distribution system.   |
| <b>Private Branch Exchange (PBX)</b>      | A manually, or operator controlled switching system, usually on the customer's premises, which serves that customer's telephones over a common group of lines from the central office.   |
| <b>Radio Common Carrier (RCC)</b>         | A company which furnishes public telecommunications service using one or more radio channels.  |
| <b>Remote Switching Unit (RSU)</b>        | An electronic switching system that is remote from its host or control office. All of the central control equipment for the RSU is located in the host switching system.   |

## NOTES TO INCOME STATEMENT OR BALANCE SHEET

In the space provided below, disclose all material information not included elsewhere in this report that is necessary to make the financial statements clear and understandable. Included should be:

- 
1. A summary of significant accounting policies. (The summaries should disclose, but not be limited to, the utility's accounting policies with regard to pension cost, unbilled revenues, depreciation, and income taxes.)

The accounting policies of the Company conform to generally accepted accounting principles. Management uses estimates and assumptions in preparing its financial statements. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Telephone operations reflect practices appropriate to the telephone industry. The accounting records of the company are maintained in accordance with Uniform System of Accounts for Class A and B Telephone Companies prescribed by the Federal Communications Commission as modified by the Public Service Commission of Wisconsin (PSCW).

### A. Property and Equipment

Telephone plant is capitalized at original cost, including the capitalized cost of salaries and wages, materials, certain payroll taxes, and employee benefits.

The Company provides for depreciation for financial reporting purposes on the straight-line method by the application of rates, based on the estimated service lives of the various classes of depreciable property.

Renewals and betterments of units of property are charged to telephone plant in service. When telephone plant is retired, its cost is removed from the asset account and charged against accumulated depreciation, together with removal cost less any salvage realized. No gains or losses are recognized in connection with routine retirements of depreciable property. Repairs and renewals of minor items of property are included in plant specific operations expense.

### B. Income taxes

Income taxes are accounted for using a liability method and provide for the tax effects of transactions reported in the financial statements including both taxes currently due and deferred. Deferred taxes are adjusted to reflect deferred tax consequences at current enacted tax rates. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities include the difference between carrying amounts of depreciable assets and partnership investment basis. The deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled.

### C. Revenue Recognition

## NOTES TO INCOME STATEMENT OR BALANCE SHEET

In the space provided below, disclose all material information not included elsewhere in this report that is necessary to make the financial statements clear and understandable. Included should be:

Revenues are recognized when earned regardless of the period in which they are billed.

Revenues relating to the provision of access services to customers are derived, in part, from tariffed access charges to toll service providers (interexchange carriers), and in part from sharing in interstate and intrastate pools. Interstate revenues are determined in accordance with nationwide average cost schedules.

The Company is compensated for intrastate access under access charge procedures based on expense and plant investment levels, as determined by the Company and approved by the PSCW.

### D. Cash Equivalents

All highly liquid investments purchased with a maturity of one year or less are considered cash equivalents.

### E. Investments

Non-marketable equity investments and temporary investments are stated at cost. Investments in affiliated companies greater than 20% are accounted for on the equity method.

- 
2. A summary of significant contingent assets and liabilities existing at year end, including a brief explanation of any action initiated by the Internal Revenue Service, Wisconsin Department of Revenue, or the utility involving a possible assessment or refund of taxes.

None

- 
3. The notes should include an explicit and precise explanation of any retained earnings restrictions and should state the amount of retained earnings affected by such restrictions.

The mortgage to the United States of America, underlying the RUS note, contains certain restrictions on the declaration of payment of cash dividends, redemption of capital stock, or investment in affiliated companies.

**AFFILIATE ABBREVIATIONS**

In column (b) provide the abbreviation for the name of the affiliate shown in column (a). Limit abbreviations to 10 characters or less. Use these abbreviations when completing the affiliated interest schedules. Insert "Other" in the Abbreviations column if the activity to be reported for a particular record in the Affiliated Interest Transactions or Affiliated Assets and Liabilities schedule represents an aggregation of activity not exceeding the dollar or percentage limits set forth in the header of that schedule.

**AFFILIATED INTEREST TRANSACTIONS**

Provide a summary of transactions under established affiliated interest contracts and arrangements (see Wis. Stat. § 196.52, for "affiliated interest" definitions). Use the space below to report transactions with individual affiliates and multiple affiliated interest agreements or, at the utility's option, with individual affiliates and a single agreement. Activity associated with affiliated contracts or arrangements not in excess of \$25,000 or 5 percent of the equity of the utility, whichever is smaller, may be aggregated in a single record. For utilities whose intrastate gross operating revenues of the previous year exceeded \$100,000,000, individual contracts or arrangements not exceeding \$100,000 may be aggregated in a single record. Where an affiliate is both providing and receiving service use one record to show billings to and a second record for billings from. When billings to or from an affiliate are recorded on the books of the utility, the records underlying such billings shall be sufficient to show all the detail maintained to identify the associated accounts related to the billing.
